

Petition to the Ontario Health Minister: OHIP coverage of PSA tests

If found early enough, prostate cancer is one of the most curable cancers. Given that the PSA blood test is the best means of early detection, we, the undersigned, ask you to take steps to make PSA screening tests covered under OHIP. We also ask that you allow men who have been diagnosed with prostate cancer to have PSA blood samples taken in their doctor's office or testing lab, instead of making them travel to a hospital to be qualify for coverage.
